Performance results were generated with LBNL Windows 7.6 applied to 1/4" (6mm) clear glass and have been calculated and reported in accordance with NFRC standards. Solar Gard® is a participating member of AINCAL and the IWFA.

Performance results based on film applied to a representative automotive glass with a base visible light transmission of 75%. Due to variations in glass performance, these values should not be used to comply with local tinting laws.

Performance results are subject to variations within industry standards and should be used for comparative purposes only.

# DARKER — COOLER — BOLDER

There are many reasons for tinting your vehicle: including protection from harmful rays, comfort, safety and privacy... Solar Gard® window films are like a sunscreen for your car.

## WHY CX MAGNUM IRC?

CX MAGNUM IRC is Solar Gard's latest auto series now available in charcoal color trying to combine and meet the needs and expectations of today's customers. These Nano-Ceramic Films are designed to protect more and give more driving comfort, yet giving a superb sleek look to the vehicle.

The advanced ceramic technology found in CX MAGNUM IRC blocks more than 99% of UV rays, rejects up to 91% of infrared rays and has a solar energy rejection (TSER) of up to 70%. Uncomfortable and sometimes dangerous glare from blinding sunlight is reduced by up to 97%.

*"One of the largest ranges on the market."*

The technology of ceramic nanoparticles used in the CX MAGNUM IRC gives the vehicle windows a deeper and truer black shade with minimal reflection. Unlike metallized films CX MAGNUM IRC does not interfere with mobile phones, GPS navigation, satellite radio, and other electronic devices.

### 01»

**DRIVING COMFORT**  
 Window film is designed to reject and absorb the solar energy that heats up the inside of your car. This reduces the need to use air conditioning.

### 02»

**UV PROTECTION**  
 Solar Gard window film blocks up to 99% of the harmful UVA and UVB rays from the sun that can cause skin cancer with an SPF rating of 285 - 1000.

### 03»

**SAFER DRIVING**  
 Window film reduces the glare from the sun, snow and headlights, which can increase visibility to make driving safer.

### 04»

**GLARE PROTECTION**  
 Uncomfortable and sometimes dangerous glare from blinding sunlight can instantly and effectively be reduced by up to 97%.

### 05»

**ENHANCED PRIVACY**  
 Increase privacy and even helps prevent theft by reducing the outside view of possessions inside the car.

### 06»

**PROTECTING YOUR INVESTMENT**  
 Heat rejection coupled with UV protection can prevent sun damage and fading to your car's interior, maintaining the interior of your car longer.

### 07»

**CUSTOMIZE YOUR LOOK**  
 Window film can give your car a customized sleek look with a variety of shades and colors. CX MAGNUM IRC offers eight shades to accommodate any driver's preference and minimize glare.

Note: All window films must be applied in accordance with local tint laws by a professional Solar Gard installer.
